RAD is specifically designed for the storage and fast presentation of defensive weapons in a wide range of home and office environments. These units are 2 ft. and 4 ft. long. RAD cabinets have a stealthy design, are easily concealed and can be disguised as something else, such as an electrical box.

They are surface mounted horizontally or vertically, ideally in an inconspicuous location, such as a bedroom closet, home/business

office or your family's emergency meeting place.

Weapons are stored by means of specially designed accessories that clip to the twin rails inside RAD. Accessories designed to hold weapons have a protective plastic or foam coating. All accessories are uniquely designed so the cabinet is customized to exactly how it would be accessed in an emergency situation.

RAD's comes standard with a strong key-lock latch to keep unauthorized persons out. An optional electronic lock is also available. Once unlocked, our unique gas spring deployment system opens the cabinet, enabling the use of both hands to quickly access multiple tactical items.

RAD's are also available in 2 ft. Mobile RAD2, 4 ft. Mobile RAD4, Double-door RAD GunWall and Double-door RAD GunWorks. RAD2 comes standard with handgun holder, magnetic holder, and flashlight/clip holder. RAD4 comes standard with rifle hook holder, magnetic holder, and flashlight/clip holder.
